Yunlong Song | M.Sc.

PERSONAL INFORMATION

Nationality:	*Chinese*
Date of birth:	*18 Jun. 1992*
Research interests	*Reinforcement Learning*, *Computer Vision*, *Digital Signal Processing*, *Robotics*, *Data Science*.

EDUCATION

Oct. 2015 – Aug. 2018 **M.Sc. in Information and Communication Engineering** **@TU Darmstadt**, Germany

- **GPA:** 1.7/1.0
- **Focus:** *Machine Learning, Digital Signal Processing*
- **Thesis:** *Minimax and Entropic Proximal Policy Optimization*
  (Under review by AISTATS 2019 | Grade: 1.0/1.0 | Advisor: Prof. Jan Peters.)

Sep. 2010 – Jul. 2014 **B.Eng. in Communication Engineering** **@Shanghai University**, China

- **GPA:** 3.2/4.0
- **Focus:** *Communication Technology, Information Theory, Embedded System*
- **Thesis**: *Research and Development of An Autonomous Indoor Three-dimensional Positioning System*
  (Outstanding Undergraduate Thesis | Grade: 4.0/4.0 | Advisor: Prof. Jinyi Zhang.)

EXPERIENCE

Apr. 2017 – Current (19 months) **Intern & Working Student** – in Computer Vision **@AGT International**, Germany

- Deep metric learning with Siamese networks
- Face recognition in sports videos using OpenCV and Dlib
- Docker images for computer vision software development

Jul. 2016 – Aug. 2017 (17 months) **Student & Teaching Assistant** – in the field of Statistics **@TU Darmstadt**, Germany

- Digital Signal Processing (Lab, 4 months)
- Statistical Machine Learning (Lecture, 3 months)
- Robot Learning (Lecture, 4 months)
- Convex Optimization for Wireless Multi-hop Networks (Research Project, 6 months)

Oct. 2016 – Mar. 2017 (6 months) **A Student Project** – in Robot Learning **@TU Darmstadt**, Germany

- Learn intuitive physics from videos with multi-scale conditional generative adversarial networks
- Trajectory prediction of moving objects from unlabeled videos

Apr. 2014 – Jun. 2014 (3 months) **Software Intern** – in Integrated Circuit Design **@SONY**, China

- System on Chip (SoC) testing for image processing modules
- SystemC programming

SKILLS

Programming languages:	Python, C/C++, Matlab.
Hardware languages:	Verilog, VHDL.
C++/Python packages:	OpenCV, Dlib, Boost, TensorFlow, Pandas, Seaborn, Scikit-learn, SciPy, PyTorch, etc.
Tools:	Git, Vim, Docker, CMake, LaTeX, GitHub Pages, Bash Script, etc.
Systems	macOS, Linux, Windows, and Lichtenberg High Performance Computer (a computer cluster).

LANGUAGES

Chinese (native), English (fluent), German (intermediate), Japanese (basic).

AWARDS

Recipient of several scholarships and awards due to excellent academic performance since 2012. For example, *Second-class scholarship (@Shanghai University, 2012)*, *National encouragement scholarship (@Shanghai University, 2013)*, *Scholarship for international students in their final study phase (@TU Darmstadt, 2018).*
